## Message from the Minister

I take great pleasure in congratulating the 109 recipients of 2016 Citations for Outstanding Contributions to Student Learning, awarded through the Australian Awards for University Teaching program.

This year we recognise individuals and teams who have developed innovative and imaginative approaches to deliver world class learning experiences. These citations showcase the outstanding teachers and teams working across a wide range of study areas and disciplines. They also demonstrate the impact that true collaboration with students, colleagues, communities, industry and business has on producing excellent outcomes.

STEM learning and teaching and the promotion of practices to improve student employability are widely recognised in this year's citations. Recognition is given to work on topics such as inter-professional education for health sciences students; projects that foster leadership in science and mathematics education and enhance science students' learning experience; and the development of an industry driven curriculum for mechanical engineering students that improves their readiness for professional careers.

The Australian Government understands how important excellent learning and teaching is to our international reputation for quality higher education. Recognising these individual teachers and teaching teams encourages and inspires all educators who are dedicated to delivering a better, richer experience for students.

Together with the Department of Education and Training, I commend all 2016 recipients for your dedication to developing and improving practices and programs that produce outstanding results in student learning, preparing them with the skills, knowledge and attributes they need for the future.
